

A protected next step for business owners

Private broker matching at no seller cost

LeadHarbour gives accountants, lawyers, restructuring advisers, councils and business networks a safe resource to share when an owner asks about selling. The owner opts in directly and remains in control of every introduction.

Seller initiated

The owner requests the assessment directly. Partners do not provide client lists or confidential records.

Identity protected

No broker receives the seller's identity merely because a link was shared or a public signal exists.

Governed release

Authority, representation, conflict and introduction-scope checks apply before approved contact.

Review the partner pathway

Scan for the public partner page and downloadable safeguards.

How an approved partner uses it

1. Share an approved source-specific link only in an authorised context.
2. The owner privately opts in and verifies their request.
3. LeadHarbour presents expert broker options and applies release checks.
